

To Whom It May Concern:

The Catalina Express Engineering department has been using BIO TUFF Multipurpose degreaser for over three years to help keep our engines and bilge areas clean. It works remarkably well in removing exhaust soot from our vessel hulls and we especially like that it is biodegradable and non-toxic as well as non flammable. We have tried numerous degreasing products, but BIO TUFF is the only environmentally friendly agent that has been strong enough to get the job done.

Respectfully  
Tony Ross  
Director of Vessel Engineering  
Catalina Express
