

02/03/2021

John Schwartz,

Our goal of delivering Bad Ass beer to our customers would not be possible without a well maintained and clean packaging facility. The Packaging Department at Stone Brewing has been using Bio-Tuff for years in our everyday upkeep as well as deep cleaning. At the end of every week we use Bio-Tuff to scrub down conveyors, drip trays and floors of the built-up beer residue. We also use it to clean inside of our packaging equipment and throughout our facility. Bio-Tuff offers us a safe, affordable and singular cleaning agent. We always keep a drum in stock!

Respectfully,

Jake Speakman

Manufacturing Specialist

Stone Brewing
